In the upcoming months, Civic Square will be undergoing a huge facelift aimed at improving the aesthetics of the property as well as your enjoyment. This project will include all new roof, siding, and windows to make the building more attractive and energy efficient. In addition we are adding a new fitness center with all new equipment, community room, secure package room, office and outdoor amenity space.

Our plan is to have these updates completed by the end of 2024. It is our aim to make Civic Square the best it can be and an even better place for you to call home.

Thank you for your cooperation and understanding as we work to enhance your living experience at Civic Square!
